

Pull next to the kerb and keep a few car lengths from the target vehicle.

The target vehicle may be **facing towards or away from you.**

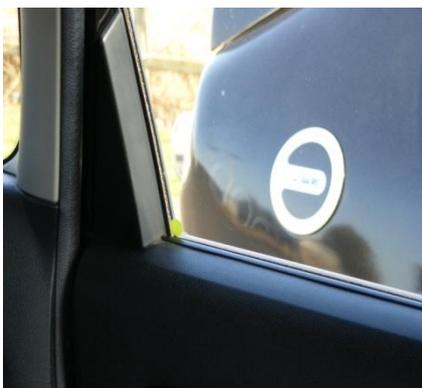

Move slowly forward to take up the following position.

Pull alongside the target vehicle **and stop when your passenger side door mirror is level with the head light/tail light of the vehicle depending on which way it is facing.**

**Stop and select reverse gear, conduct 360\* observations** and prepare to move at Zimmer speed.

If safe move back to the point of turn.

**Stop when the small yellow dot on the rear door window rests on either the head or tail light of the target vehicle depending on the direction it is facing.**

Apply the parking brake and **check 360\*** looking for any risk.

If safe move **a Zimmer speed and apply 1 turn of steering left quickly** while looking to the rear.

Allow the kerb to drift across **the rear window until the small yellow dot on the screen rests on top of the kerb.**

**Quickly apply 1 turn of steering to the right** whilst still moving at Zimmer speed.

**Again check 360\*** all around looking for risks.

If you need to stop at this point it will be acceptable.

This is the view in the door mirror once you have taken the 1 turn to the right.

Continue to move at Zimmer speed and again check 360\* for any risk.

Keep glancing in the door mirror but don't stare.

Allow the white dot on the wheel arch to rest on the edge of the kerb.

Quickly apply ½ turn of steering to the right.

Again check 360\* for risks but allow the vehicle to keep moving at Zimmer speed.

Allow the car to arrive parallel with the kerb and quickly straighten the steering (½ turn to the left)

Stop the vehicle as soon as you are parallel.

Apply the parking brake and select neutral gear.

## Points to remember,

- This is a **slow speed exercise**; keep your speed to **Zimmer frame speed only**.
- Stop if another **vehicle is within 10 meters** of your vehicle.
- Stop if a **pedestrian is within 5 meters** of your vehicle.
- **Main observations are to the rear** of the vehicle with occasional check all around.
- Always remember that **children and elderly people are venerable** and may require extra considerations.
- If you think you are going to strike the kerb **STOP** and shunt forward.
